

Decoration

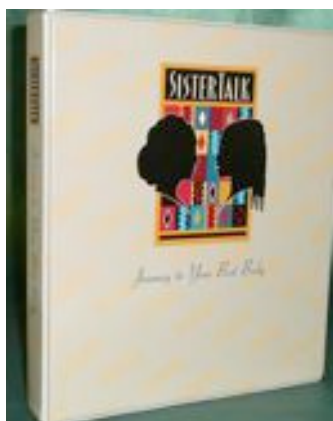

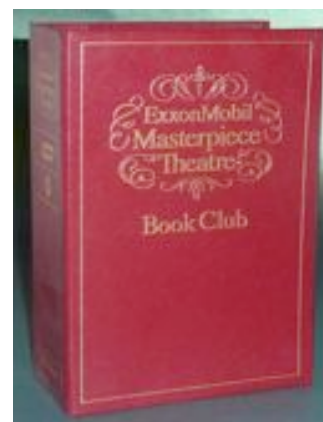

The very heart of a custom product is its decoration. We offer a full range of processes so your decoration will make your product stand out from the rest. Choose from one or more of the following:

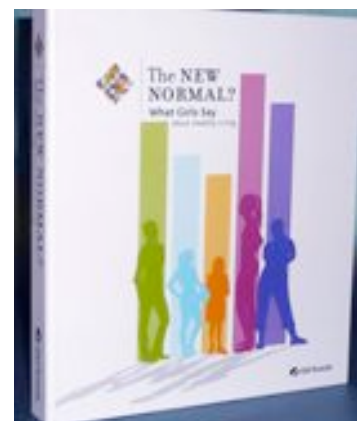

Silk Screen – Silk screening gives you the opportunity to create high quality images on a variety of substrates and surfaces. Using the PMS Matching System, we can create any color to make your product stand out. Silk screening is good for fine detailed work to large images.

Foil Stamping –Stamping is used to call attention to your decoration in brilliant gold or silver foils. There are many foil colors to choose from. Use pigmented or special foils to add highlights and special effects.

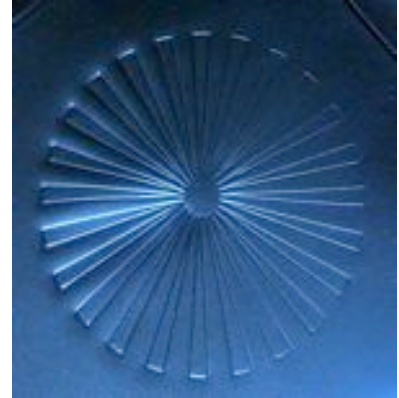

Color Process Printing – Process printing is available on a variety of materials. These materials are Vinyl, Laminated paper wraps, Poly and SBS board. This process allows you to print color photo on your binders, cover stocks and folders.

ADVANCED LOOSELEAF TECHNOLOGIES

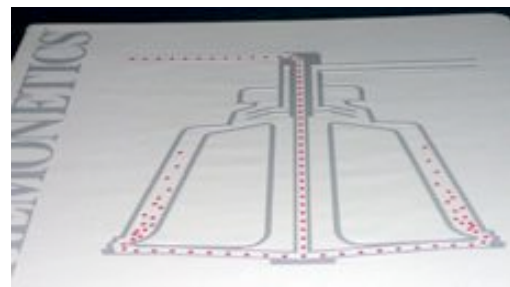

Blind Debossing & Embossing – **Blind** debossing & embossing are great ways to add character to your product in a subtle way.

Color Fill Stamping – Available on our high-end vinyl products, color fill is a truly luxurious form of decoration. Color fill deeply embeds foil into the surface for a truly distinctive look.

Appliqué - Appliqué is the process of using colored vinyl to decorate your vinyl. This gives the decoration a special raised look.

ADVANCED LOOSELEAF TECHNOLOGIES

Entrapment/Embedment – Printed sheets sealed *securely* under clear vinyl on all sides so your imprinted sheets cannot be removed. This professional looking binder allow client to have a 4 color process binder at affordable pricing.
